

In re Application of: Amir LOSHAKOVE et al.
 Serial No.: 10/535,383
 Filed: May 16, 2005
 Office Action Mailing Date: October 30, 2007

Examiner: Rajarshi GANGULY
 Group Art Unit: 4153
 Attorney Docket: 37443

In the Claims:

1. (Currently Amended) A method of performing an anastomosis, comprising:
 juxtaposing ~~two~~first and second blood vessels to be anastomosed using a juxtaposition device, to a desired configuration in which at least ~~one~~said first vessel is an end vessel;
 applying an adhesive to said vessels while they are in said configuration, said adhesive being sufficient to ensure both sealing and bonding of said two vessels to each other;
 and
 removing said juxtaposition device after said adhesive sufficiently sets;
 wherein ~~the~~said juxtaposition device remains primarily external to at least ~~one of the vessel~~said first vessel during the juxtaposing.
2. (Cancelled)
3. (Currently Amended) A method according to claim 1, wherein said juxtaposing comprises inserting a portion of said juxtaposing device into at least one of said vessels.
4. (Currently Amended) A method according to claim 1, wherein said juxtaposing comprises inserting a portion of said juxtaposing device into a wall of at least one of said vessels.
- 5-17. (Cancelled)
18. (Currently Amended) A method according to claim 1, wherein said applying comprises applying using a plurality of nozzles arranged in a ring.
19. (Currently Amended) A method according to claim 1, wherein said applying comprises applying into a mold adjacent said anastomosis area, ~~which~~so as to mold shapes the said adhesive about said area.
20. (Cancelled)

Attorney Docket: 37443

21. (Currently Amended) A method according to claim 1, wherein said applying comprises applying a pre-measured amount of adhesive.

22-24. (Cancelled)

25. (Original) A method according to claim 1, wherein said removing comprises removing before said adhesive sets completely.

26. (Currently Amended) A method according to claim 1, wherein said ~~removing~~ comprises removing adhesive is sufficiently set as soon as said adhesive starts to set.

27-28. (Cancelled)

29. (Original) A method according to claim 1, wherein no foreign materials other than said adhesive remain in said anastomosis.

30. (Original) A method according to claim 1, comprising providing at least one strengthening element in said anastomosis and leaving said at least one strengthening element permanently in said anastomosis.

31. (Previously Presented) A method of performing an anastomosis, comprising:
attaching at least a first external scaffold element to a first blood vessel;
attaching at least said first external scaffold element or a second external scaffold element to a second blood vessel;
positioning said blood vessels using said at least a first external scaffold element, to a desired configuration;
applying an adhesive to said vessels while they are in said configuration, said adhesive being sufficient to ensure both sealing and bonding of said two vessels to each other;
and
removing said at least first external scaffolding element.

Attorney Docket: 37443

32. (Original) A method according to claim 31, wherein said first blood vessel is a side vessel.

33. (Original) A method according to claim 31, wherein said first blood vessel is an end vessel.

34. (Original) A method according to claim 31, comprising mechanically attaching said at least first scaffolding element to said first blood vessel.

35. (Original) A method according to claim 34, wherein mechanically attaching comprises piercing.

36. (Original) A method according to claim 34, wherein mechanically attaching comprises hooking.

37-40. (Cancelled)

41. (Original) A method according to claim 31, wherein said at least one scaffolding element comprises a plurality of wires adapted to engage a blood vessel.

42. (Cancelled)

43. (Original) A method according to claim 31, wherein said at least one scaffolding element comprises a balloon.

44-50. (Cancelled)

51. (Currently Amended) A method according to claim 31, wherein said removing comprises removing at least one of said at least one scaffolding elements before said adhesive sets.

52-76. (Cancelled)

Attorney Docket: 37443

77. (Previously Presented) An adhesive anastomotic system, comprising:
a first blood vessel holder;
a second blood vessel holder adapted to interlock with said first blood vessel holder, such that blood vessels held by said two vessel holders contact; and
an adhesive port on at least one of said first vessel holder and said second vessel holder, said port configured to deliver an adhesive to said contact at an external portion of the contact.

78-81. (Cancelled)

82. (Previously Presented) A method according to claim 1, wherein only one of said vessels is an end vessel.

83. (Previously Presented) A method according to claim 1, wherein the applying is performed by the juxtaposition device.

84. (Previously Presented) A method according to claim 77, wherein only one of said vessels is an end vessel.

85. (Previously Presented) A method according to claim 77, wherein the first blood vessel holder and the second blood vessel holder are each substantially outside their respective blood vessels.

86. (New) A system according to claim 77, wherein said first blood vessel holder and said second blood vessel holder are configured to be removed after anastomosis of the blood vessels.
